The Parliament General advanc'd towards the King's Army, and comes to Naseby in Northamptonshire; and his Majesty's Army at the same time coming from Leicester, by the way of Harborough, they gave Battel to the Rebels upon Broad Moor in Naseby Field. This was called the Fatal Battel of Naseby, &c. of which take this brief Account: His Majesty himself commanded the main Body, the Right Wing was commanded by Prince Rupert and Maurice, the Left by Sir Marmaduke Langdale. Sir Thomas Fairfax commanded the Main Body of the Rebels, Cromwell the Right Wing, and Ireton the Left. Prince Rupert falls upon their Left Wing, routs them, and pursues them thro' Naseby Town. In the mean time Fairfax falls on the King's Main Body, and Ironsides Cromwell charging furiously on the Left Wing of the King's Army, brake the King's Army all in Pieces. Yet there were great Rallying on both sides, and many sharp Contests, till at length the Victory turned wholly to the Parliament. The King's Horse retreating disorderly towards Leicester, were pursued by Cromwell, and a great many of them taken. The Foot-Souldiers desiring Quar-

This was the last set Battel that ever the King fought, and might well be called the *Fatal Battel* of *Naseby*.

1646 His Royal Majesty most graciously the second time offered to come to the Two Houses, and advise with them for the good and safety of the Kingdom; as also upon some Conditions to pass an Act of Oblivion and Free Pardon: which was refused by the Parliament, who had great advantage of the King at this time. A Description of the four Quarters of the Year, and first of Winter.

Sol in Capricorn, Aquarius, Pifces.

According to the custom of Writers in this kind, Winter-quarter is the first quarter, which doth begining the 11 day of December, at which time the Sun enter'd into the first degree of the told and day Sign Capricorn, being the most remote from us, in his farthest South Declination, causing the days with us to be shortest, and the nights longest. This quarter continues until the Sun hath slowly passed through Capricorn, Aquarius, and Pifces; and doth naturally resemble Old Age.

Of the Spring. Sol in Aries, Taurus, Gemini.

This quarter doth take beginning the 10th of March; at which time the Sun entereth into the first minute of Aries, making equal day and night; and continues whilst the Sun is passing through Aries, Taurus and Gemini. This quarter doth resemble Growing Youth.

Of Summer. Sol in Cancer, Leo, Virgo.

The Summer-quarter doth take his beginning when the Sun enters in to the first degree of Cancer, which will be this year on the 11 o June; and continues whilst the Sun passeth through Cancer, Leo, Virgo. Now the days are longest, and the air hottest; therefore but for necessity, bid Physick adieu.

Of Autumn. Sol in Libra, Scorpio, Sagittarius.

Autumn, or Harvest-quarter (commonly called the Fall of the Leaf, or (some the latter Spring), begins when the Sun enters into the first degree of Libra, again making the day and night of equal length; which will be this year the 12 of September, and continues whilst the Sun passes through Libra, Scorpio, and Sagittarius. This quarter doth naturally resemble Declining Age, and Phlegmatick Complexion.
